### ACADEMIC PROJECT: -

**Project Title:** - Tours And Travels Management Services

**GitHub Link:** - [https://github.com/ajaykhade/SAFARI-Tours\\_And\\_Travel\\_Management\\_App.git](https://github.com/ajaykhade/SAFARI-Tours_And_Travel_Management_App.git)

**Project Technology:** - Spring Boot, React, SQL

#### **Project Description:** -

This application is an interface for both customers (for browsing tours and booking tickets) and admins (for managing tours). This is a web-based application that hosts a wide collection of tours and shows that users can browse through.

Customers can see tours details, choose tour by destination, by budget and accordingly book tickets for the tours they like. They can register their profile, sign in, book tickets, give feedback. They can view their booking history as well. Once they are done, they can logout of their profile.

Admins can manage various tour details like tour timings, seats available, price for every tour category, adding new tours, etc. Admins can even delete users if the need arises.

### **TECHNICAL SKILLS: -**

- **Languages:** Java, C#
- **Front End Web Technologies:** HTML5, CSS, JavaScript, React
- **Database:** SQL, Oracle, MongoDB
- **Frameworks:** Spring MVC, Hibernate, Spring Boot, MS.NET
- **Version Control Tool:** Git, GitHub
- **Microsoft Office:** Excel, Power Point, Word
